

Bypass Level Indicator BNA

Bypass level indicator with magnetic display

- Process- and system-specific production
- Operating limits:
 - Operating temperature: $T = -196 \dots +450 \text{ }^\circ\text{C}$
 - Operating pressure: $P = \text{vacuum to } 400 \text{ bar}$
 - Limit density: $\rho \geq 340 \text{ kg/m}^3$
- Wide variety of different process connections and materials
- Mounting of level sensors and magnetic switches possible as an option
- Explosion-protected versions

D-EN-BNA-20190429

Bypass Level Indicator BNA

Bypass level indicator with magnetic display

Applications

- Continuous level indication without power supply
- Indication of the level proportional to height
- Individual design and corrosion resistant materials make the products suitable for a broad range of applications
- Chemical, petrochemical industry, oil and natural gas extraction (on- and offshore), shipbuilding, machine building, power generating equipment, power plants
- Process water and drinking water treatment, food industry, pharmaceutical industry

Special features

- Process- and system-specific production
- Operating limits:
 - Operating temperature: $T = -196 \dots +450 \text{ °C}$
 - Operating pressure: $P = \text{vacuum to } 400 \text{ bar}$
 - Limit density: $\rho \geq 340 \text{ kg/m}^3$
- Wide variety of different process connections and materials
- Mounting of level sensors and magnetic switches possible as an option
- Explosion-protected versions

Description

The bypass level indicator model BNA consists of a bypass chamber, which, as a communicating tube, is connected laterally to a vessel via at least 2 process connections (flanged, threaded or welded). Through this type of arrangement, the level in the bypass chamber corresponds to the level in the vessel. The float with a built-in permanent magnetic system, which is mounted within the bypass chamber, transmits the liquid level, contact-free, to the magnetic display mounted to the outside of the bypass chamber. In this are fitted, at 10 mm intervals, two-coloured plastic rollers or stainless steel flaps with bar magnets.

Bypass level indicator, model BNA with level sensor and magnetic switch

Through the magnetic field of the permanent magnetic system in the float, the display elements, through the wall of the bypass chamber, are turned through 180°. For an increasing level from white to red; for a falling level from red to white. Thus the bypass level indicator clearly displays the level of a vessel **without power supply**.

Bypass Level Indicator BNA

Bypass level indicator with magnetic display

Further special features

- Simple, robust and solid design, long service life
- Bypass chamber and float from stainless steel 1.4571, 1.4404 or special materials
- Pressure- and gas-tight separation between measuring and display chamber
- Measuring and indicating of the level of aggressive, combustible, toxic, hot and contaminated media
- Functioning of the magnetic display guaranteed even in the case of power failures
- By using a variety of corrosion-resistant materials, applicable for virtually all industrial applications
- Continuous measurement of levels, independent of physical and chemical changes of the media such as: Foaming, conductivity, dielectric constant, vapours, bubble formation, boiling effects
- Interface-layer level measurement from Δ density 100 kg/m³
- Special versions: Food compliant, coatings, liquid gas, heating jacket

Illustration of the principle

Design and operating principle

- In a communicating bypass chamber mounted to the side of a vessel a float moves with the level of the medium to be measured.
- The magnetic field of the radial-symmetric magnetic system positioned in the float activates the magnetic display attached to the outside of the bypass chamber as well as the switching and measuring elements.

Magnetic system

The magnetic system is assembled from a pole disc and various magnets. These can be individually adapted to the different chamber dimensions and for temperatures up to 450 °C.

Bypass Level Indicator BNA

Chamber end top	<ul style="list-style-type: none"> Flat top Options: (see page 14) <ul style="list-style-type: none"> ▣ Vent screw ▣ Vent valve ▣ Vent flange
Chamber end bottom	<ul style="list-style-type: none"> Flange connection Options: (see page 14) <ul style="list-style-type: none"> ▣ Drain plug ▣ Drain valve ▣ Drain flange
Process connections	<ul style="list-style-type: none"> 2 x lateral (options see page 15) Flange EN 1092-1, DN 10 - DN 100, PN 6 - PN 100 Flange DIN, DN 10 - DN 100, PN 6 - PN 100 Flange ANSI B 16.5, 1/2" - 4", class 150 - class 600 Weld stub 1/2" - 1" Threaded bushing G/NPT 1/2" - 1" Threaded nipple G/NPT 1/2" - 1"
Heating jacket connection	<ul style="list-style-type: none"> Flange EN 1092-1, DN 10 - DN 25, PN 6 - PN 40 Flange DIN, DN 10 - DN 25, PN 6 - PN 40 Flange ANSI B 16.5, 1/2" - 4", class 150 - class 300 Threaded bushing G/NPT 1/2" - 1" Threaded nipple G/NPT 1/2" - 1"
Centre-to-centre distance	Min. 150 mm to max. 6,000 mm (larger distances on request)
Material	<ul style="list-style-type: none"> Stainless steel 1.4571 with bypass chamber Ø 60.3 x 2 mm (standard version) Stainless steel 1.4404 with bypass chamber Ø 60.3 x 2.77 mm on request
Nominal pressure	Max. 64 bar
Temperature range	-60 ... +450 °C
Float	Cylindrical float, model BFT-H, see data sheet LM 10.02
Magnetic display	<ul style="list-style-type: none"> Standard version, model BMD-S: < 200 °C High-temperature version, model BMD-F: > 200 °C, see data sheet LM 10.03
Level sensor	<ul style="list-style-type: none"> Reed sensor, model BLR, see data sheet LM 10.04 Magnetostrictive sensor, model BLM, see data sheet LM 10.05
Magnetic switches	Magnetic switch, model BGU, see data sheet LM 10.06
Approvals	Ex c, GL, GOST-R

Special versions on request

Bypass Level Indicator BNA

Bypass level indicator with magnetic display

Option bypass chamber end

Other ends on request

Other ends on request

D-EN-BNA-20190429

Bypass Level Indicator BNA

Bypass level indicator with magnetic display

Option process connection

Other connections on request

D-EN-BNA-20190429

Bypass Level Indicator BNA

Bypass level indicator with magnetic display

CE conformity

Pressure equipment directive
97/23/EC, pressure accessory

ATEX directive (option)
94/9/EC, ignition protection type Ex c, zone 0/1, gas

Approvals

- GL, ships, shipbuilding, offshore, Germany
- DNV, ships, shipbuilding, offshore, Norway
- ABS, ships, shipbuilding, offshore, USA
- GOST, national standard for Russia, Kazakhstan and Belarus
